ASSIGNMENT- 1

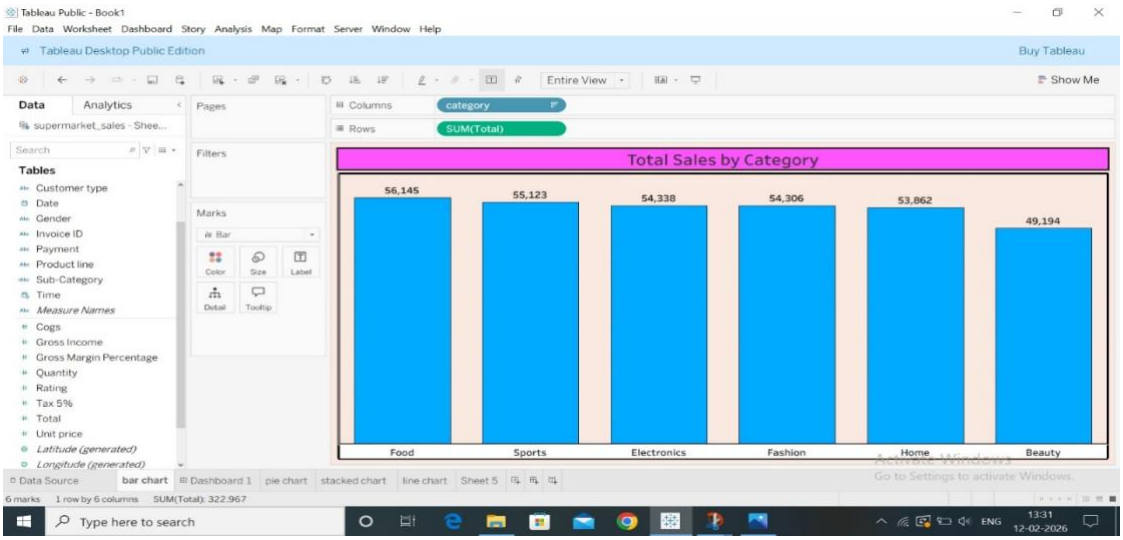
Bar chart

Aim: Create Sales by Product Line (Bar Chart)

- **Step 1: Open Tableau**
  - Open Tableau Public / Tableau Desktop.
  - Connect to your dataset (Example: supermarket_sales.csv or Excel file).
  - Click Sheet 1.
- **Step 2: Check Your Data**
  - Make sure you have:
  - Product line (Dimension)
  - Total (Measure)
- **Step 3: Drag Fields to Create Chart**
  - Drag Product line → Drop into Columns shelf.
  - Drag Total → Drop into Rows shelf.
  - Tableau automatically shows a Bar Chart.
- **Step 4: Change to SUM (if needed)**
  - Check if it shows SUM(Total).
  - If not:
  - Click on Total (pill) in Rows.
  - Select Measure → Sum.
- **Step 5: Show Data Labels**
  - Go to Marks Card.
  - Click Label.
  - Tick Show Mark Labels.
  - Now values like:
  - 56,145

    - 55,123
    - 54,338 will appear on top of bars.
- **Step 6: Add Title**
    - Double click on the sheet title.
    - Type: Sales by Product Line
    - Click OK.
- **Step 7:** Format (Optional – for design like image)
    - Click Format → Shading → Change background color.
    - Click Color in Marks → Choose bar color (Orange).
    - Adjust font size if needed.

FINAL OUTPUT:



PIE CHART

Aim: Create "Total Sales by Payment Type" Pie Chart in Tableau

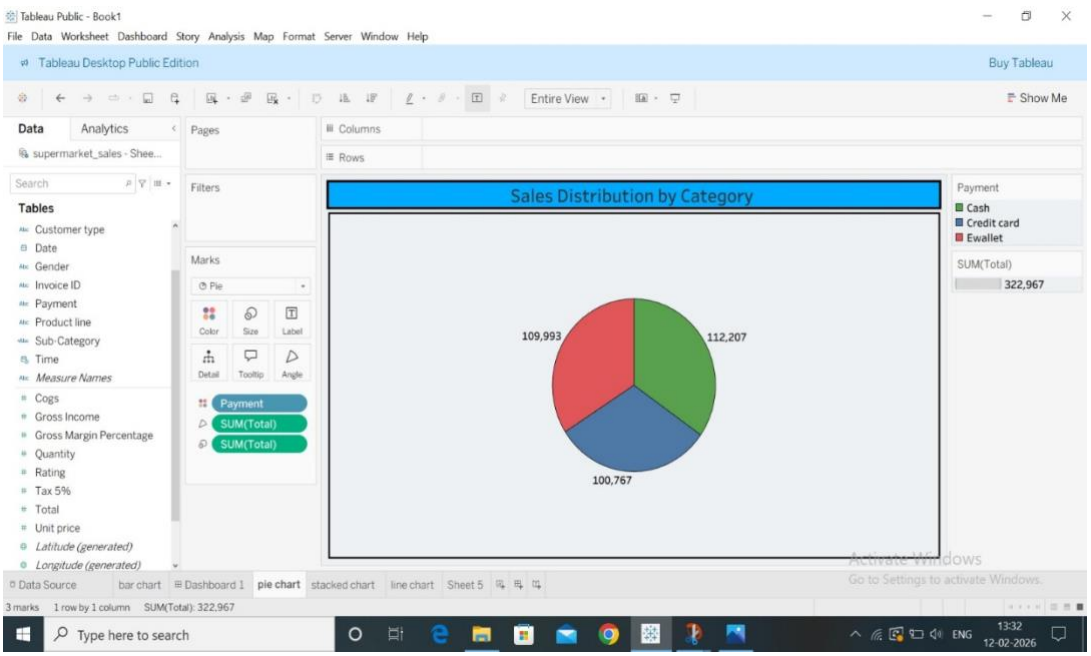
- **Step 1: Open Tableau**
    - Open Tableau Public / Tableau Desktop.

    - Connect to your dataset (for example: supermarket_sales.xlsx).
    - Sheet 1 (or create a new sheet).
- **Step 2: Create Pie Chart**
    - Go to the Marks card.
    - Click the drop-down menu (it may show “Automatic”).
    - Select Pie.
- **Step 3: Add Payment Type**
    - From the Data pane (left side),
    - Drag Payment field
    - Drop it on Color (inside Marks card).
    - Now pie slices will separate by Cash, Credit card, Ewallet.
- **Step 4: Add Total Sales**
    - Drag Total (measure)
    - Drop it on Angle (Marks card).
    - This controls the size of each slice.
- **Step 5: Show Values on Pie**
    - Drag Total again
    - Drop it on Label.
    - Click Label
    - Tick Show Mark Labels.
    - Now sales numbers will appear on pie chart.
- **Step 6: Adjust Size**
    - Click Size in Marks card.
    - Increase the slider to make pie bigger.
- **Step 7: Add Title**
    - Double click on the title area.

- Type:
- Copy code
- Total Sales by Payment Type
- Click OK.

- **Step 8: Format (Optional)**
  - Click Color → Edit Colors to change slice colors.
  - Click Format → Shading to change background.
  - Center align the title.

➢ **FINAL OUTPUT:**



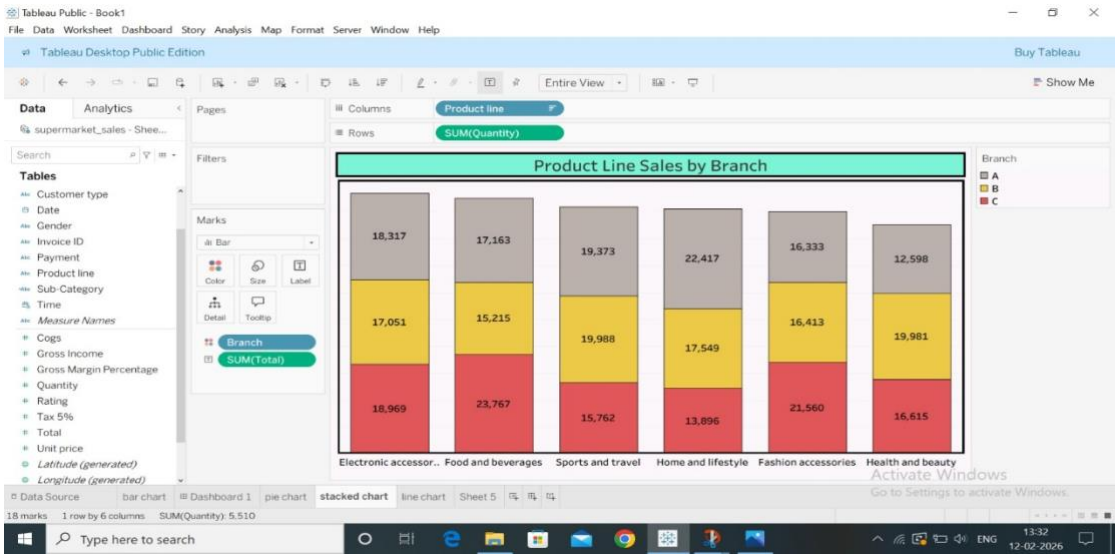
STACKED BAR CHART

Aim: create "Branch Wise Sales Distribution by Product Line" In stacked bar chart in tableau

- **Step 1: Open Tableau**
  - Open Tableau Public / Tableau Desktop.
  - Connect to your dataset (example: supermarket_sales).

- **Step 2: Go to Worksheet**
  - Click on Sheet 1 to open a new worksheet.
- **Step 3: Drag Fields to Columns and Rows**
  - Drag Product line → to Columns shelf.
  - Drag Total (or Sales) → to Rows shelf.
  - Make sure it shows SUM(Total).
- **Step 4: Change Chart Type to Bar**
  - Go to Marks Card.
  - Select Bar (if not already selected).
- **Step 5: Add Branch for Stacking**
  - Drag Branch → to Color in the Marks card.
  - Now bars will be divided by Branch (A, B, C).
  - This creates a stacked bar chart.
- **Step 6: Show Labels**
  - Drag SUM(Total) → to Label in Marks card.
  - Click Label → Tick Show Mark Labels.
- **Step 7: Format the Chart**
  - Click on the Title → Edit.
  - Rename it to: Branch Wise Sales Distribution Product Line
  - Format colors if needed.
  - Click Entire View (top center) to adjust full view.
- **Step 8: Check Stacking Option (Important)**
  - Go to Analysis menu.
  - Click Stack Marks → Select On.

➢ **FINAL OUTPUT :**



LINE CHART

Aim: Create "Total Sales by Month – 2019" Line Chart in Tableau

- **Step 1: Open Tableau**
  - Open Tableau Public / Tableau Desktop.
  - Connect to your dataset (Example: supermarket_sales.csv).
- **Step 2: Check Data**
  - Make sure your dataset has:
  - Date (Dimension)
  - Total (Measure – Sales amount)
- **Step 3: Drag Fields**
  - Drag Date → to Columns
  - Click the Date pill → Select Month
  - Choose MONTH(Date) (Discrete – blue color)
  - Drag Total → to Rows
  - It will automatically become SUM(Total)

- **Step 4: Add Year Filter (2019)**
  - Drag Date again → to Filters
  - Select Years
  - Tick only 2019
  - Click OK
  - Now it shows only 2019 data.
- **Step 5: Change Chart Type**
  - Go to Marks Card
  - Select Line (if not already selected)

    OR
  - Click Show Me (top right)
  - Choose Line Chart
- **Step 6: Show Data Labels**
  - In Marks Card
  - Click Label
  - Tick Show Mark Labels
  - Now you will see sales numbers on the chart.
- **Step 7: Add Title**
  - Double-click the title area
  - Type:
  - Total Sales by Month – 2019
  - Click OK
- **Step 8: Format (Optional)**
  - Go to Format
  - Change font size
  - Add background color if needed

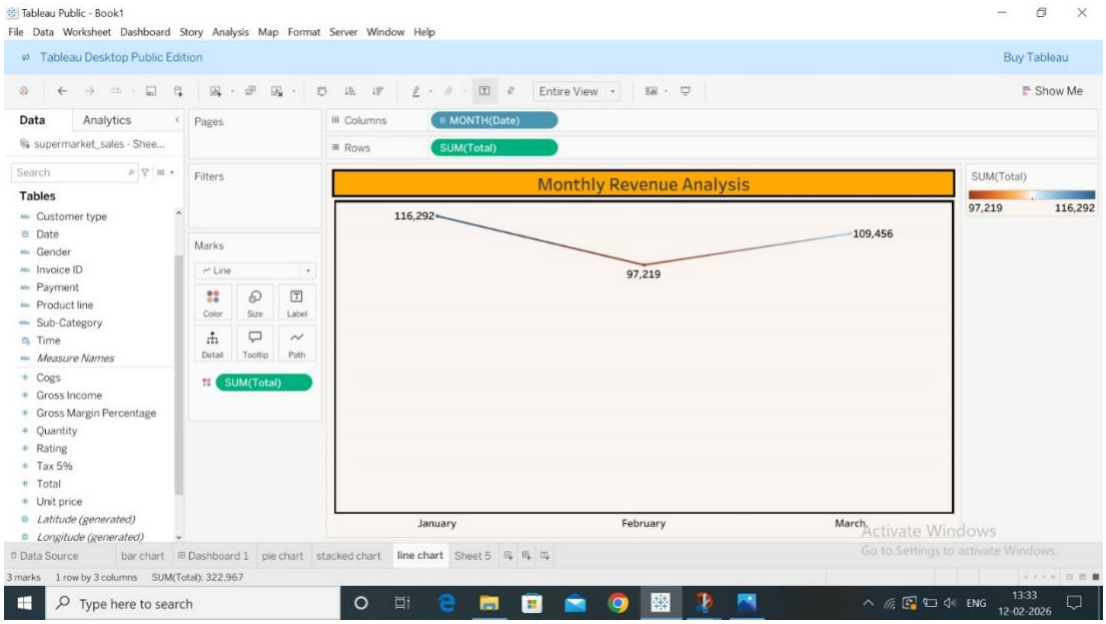
➢ **FINAL OUTPUT:**

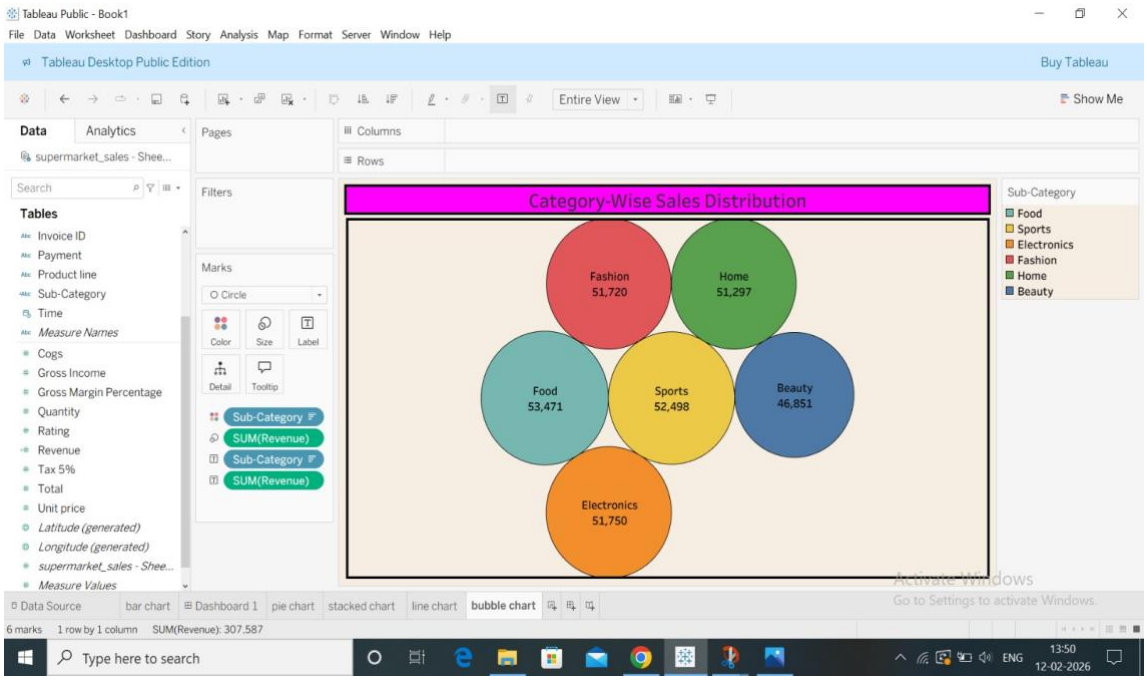


BUBBLE CHART

Aim: Create " Sales by Category (Bubble chart) in tableau

- **Step 1:** Open Tableau and connect your data.
  In your case, it's supermarket_sales.
- **Step 2:** Drag the dimension for categories to the Detail or Label in Marks.
  Here, it is Sub-category.
- **Step 3:** Drag the measure for size to the Size in Marks.
  Here, it is SUM(Revenue).
- **Step 4:** Drag the measure for labels to Label in Marks.
  Here, you can also use SUM(Revenue) so the numbers appear on bubbles.
- **Step 5:** Change the chart type:
  In the Marks card, select Circle.
- **Step 6:** Color the bubbles:

Drag Sub-category to Color in Marks.
This will give each category a different color.

- **Step 7:**Adjust bubble size (optional):
  Click Size in Marks and increase or decrease bubble sizes so they look balanced.
- **Step 8:** Add title:
  Double-click the title area and write something like: Sales by Category (Bubble Chart).
- **Step 9:** Done!
  You now have a bubble chart showing categories, sales numbers, and colors


➢ **FINAL OUTPUT:**
